

# Teaming With Greater Angels Software

The dedicated local tiger team for legacy integration & auditable AI

For capture managers and small business liaison officers on California state & local pursuits

California DGS  
Certified Small  
Business (SB)

We absorb the high-risk technical scope in your proposal — the legacy bridging and AI-governance work that strategic consultancies describe in decks and we deliver in code — while counting toward your small-business participation goal.

## WHAT WE BRING TO YOUR BID

- **Small-business credit.** DGS SB certified — counts toward California's 25% small-business participation goal. LA County LSBE eligibility: **[TBD: LSBE DATE]**.
- **Specialist scope, cleanly severable.** Secure APIs and event-stream listeners for proprietary platforms (CAD, radio consoles, ILS); constrained, auditable human-in-the-loop AI microservices; containerized Docker/Kubernetes modules that drop into your architecture.
- **Compliance-ready engineering.** CJIS-aware boundaries, encryption in transit/at rest, RBAC, SIEM-ready audit logs, WCAG 2.1 AA practice — documented so it lifts directly into your compliance matrix.
- **Proposal support.** Technical volume input, SysML architecture diagrams, and executable acceptance criteria for our workshare — evaluators can see exactly what "done" means.

## HOW WE WORK AS A SUB

- **Scoped deliverables (preferred) or supervised pods.** Fixed work packages with executable acceptance criteria; our senior engineer retains delivery accountability. We are not body-shop staff augmentation.
- **Rates:** **[TBD: RATE STRUCTURE]** — our cost structure runs on new-grad wage rates under direct senior supervision, not national-vendor billable rates.
- **Capacity:** **[TBD: CURRENT CAPACITY]**
- **Agreements:** NDA / teaming agreement executed within **[TBD: AGREEMENT TURNAROUND]**; insured (GL · Professional/E&O · Workers' Comp).

## WORKING PROOF

- **Dispatcher Assist Overlay** — human-in-the-loop AI for 9-1-1 dispatch, built for a California state RFI. 42 traceable requirements; the API rejects unapproved writes; live demo: [demo.greaterangelssoftware.com](http://demo.greaterangelssoftware.com)
- **Library Connect** — civic intake platform; integration verified against production library infrastructure. 197 architecture diagrams with scenario-level traceability.
- **Active pursuits we're tracking:** City of Los Angeles AI-Powered Pre-Plan Check Assistant (RFP #2025AIP007) — available as specialist sub for AI governance, API, accessibility, and acceptance-testing scope; CHP RFI CISS-25-001 — response submitted 6/30/2026.

## WHY US OVER A STRATEGIC CONSULTANCY

- **Doers, not decks.** The senior engineer who scopes your workshare is the one who builds and signs off on it — leadership with nearly a decade on mission-critical federal aerospace programs.
- **Local to Southern California.** On-site in Los Angeles County when your program needs it.

### COMPANY DATA

#### LEGAL NAME

Greater Angels Software, LLC

#### DGS SB CERTIFICATION

#**[SB-CERT-ID]**

#### UEI (SAM.GOV REGISTERED)

**[UEI]**

#### CAGE CODE

**[CAGE]**

#### NAICS CODES

541511 (primary) · 541512 · 541519 · 518210

#### LOCATION

Azusa, CA (Los Angeles County)

### IDEAL WORKSHARE

**Legacy data extraction:** proprietary CAD, telephony, and records systems your modern stack must read from.

**AI governance scope:** advisory AI microservices with full auditability, explainability, and human-in-the-loop controls — including MCP-based tool integration.

**Compliance & acceptance scope:** requirements traceability matrices, executable acceptance criteria per deliverable, accessibility (WCAG/ADA) conformance, and audit/logging requirements.

**Integration glue:** the connective services between incumbent platforms nobody else wants to own.
